Growing Quality Grapes to Winery Specifications

Growing Quality Grapes to Winery Specifications is a guide to growing winegrapes which meet the quality requirements of winemakers. It is the product of an extensive collaboration of experienced staff of leading Australian research agencies, winegrape growers and winemakers. It represents a significant contribution to the Cooperative Research Centre for Viticulture's aim to accelerate quality vineyard management from vine to palate.

A practical, plain language guide, produced for grapegrowers, this book is essential reading for grapegrowers seeking to meet the quality specifications of winemakers thereby minimising penalties and maximising returns.

Currently this publication retails for \$44.00 per copy (including GST) plus \$7.70 for postage and handling. The publication is printed as a paperback edition consisting of 101 pages. To order a copy access the Winetitles online book-store.
