

# Good Environmental Management Guidelines:

## Information Resources

# Information Resources

## ACKNOWLEDGMENT

This publication has been produced as part of the 'Accelerating the Adoption of Good Environmental Management' project (CRCV s4.4.9) and is based on the draft Environmental Best Management Practice Protocols developed by the CRCV's Viticare EMS project. The following people are gratefully acknowledged for their contribution:

- Members of the Good Environmental Management project steering committee;
- Members of the Viticare EMS project team;
- Daniella Csaky (Victorian Department of Primary Industries) for compiling the GEM Guidelines: Information Resources.

## EDITORS

Dr Anne-Maree Boland and Emily Tee

Department of Primary Industries, Knoxfield Centre, Private Bag 15, Ferntree Gully Delivery Centre, VIC 3156, Australia.

## THE COOPERATIVE RESEARCH CENTRE FOR VITICULTURE

The Cooperative Research Centre for Viticulture is a joint venture between Australia's viticulture industry and leading research and education organisations. It promotes cooperative scientific research to accelerate quality viticultural management from vine to palate. Australian grape growers and winemakers are key stakeholders in the CRCV, contributing levies matched by the Commonwealth Government and invested by the Grape and Wine Research and Development Corporation in the Centre.

## BACKGROUND

---

This document is a supplementary guide of information resources to accompany the following series of Good Environmental Management Guidelines:

- Vineyard Water Use Management
- Vineyard Fertiliser and Soil Management
- Vineyard Pest and Chemical Management
- Vineyard Vehicle, Machinery and Equipment Management

Listed in this document are contact details, mainly website links, to information sources that may be of assistance to you when implementing good environmental management practices on your vineyard. By no means is the list comprehensive, nor is a listing of a particular website an endorsement for that organisation. For example, the listing does not cover Northern Territory or local government information. However, many of the websites listed are Federal and State government department sites that cover information about general agricultural practices, viticulture, natural resource management, water resources, chemical management and other environmental management issues.

To view a particular website, simply select the highlighted website address and the appropriate website page will open if you are connected to the Internet. Please note that organisations' contact details may change in the future, so website links may eventually become out dated.
